Sage Ranch is an essential USD \$480 Million, 995 home sustainable sub-division. Non-dilutionary bank construction financing will be provided at the project level. Further, the USDA and other federal agencies provide 30 to 38-year, sub (2%) two percent home purchase mortgages requiring only a 3% down payment, making the mortgage payments to assist professional families, seniors and single occupants, an affordable home ownership package that is less expensive than renting.

Greenbriar owns the 995-unit project without any debt, being one of the only projects of this size in the USA, to own 995 lots, debt-free. Greenbriar has been invested in this project since 2011. In attendance on July 12 to support the construction for this project, was our architects, engineers and senior military leadership that backed our project to benefit the massive government aviation projects and its professional families, both uniformed and civilians, located nearby.

Greenbriar congratulates the City Staff and the community as a whole, for enabling Sage Ranch to have the lowest carbon footprint of any housing project of this size in the USA. Immediately adjacent Sage Ranch, are a high school, middle school and elementary school, eliminating automobile travel for education and sports. Contained within Sage Ranch are nine parks, a swimming pool, clubhouse, and soccer and tennis courts.
